

| | |
|--|---|
| | This option will likely cause current transformation activity and expected savings to be disrupted which will affect attainment of strategic goals |
| | The current health care and social care system will be challenging to replicate as it is currently delivered. It is likely that service users will be impacted and services will potentially not be delivered |
| | For adult social care only – in housing of this (and possibly other services) would create cost pressure on B&NES as well as increase requirement for service delivery and people management |
