Primary Care Flexible Staff Pool

BSW CCG has partnered with Lantum to create a Primary Care Flexible Staff Pool. This will help practices build resilience, save time, and save money as well as making it even easier for clinicians to book locum work in our local area.

What is Lantum?

Lantum is a healthcare workforce platform that aims to unite all clinicians with their healthcare organisations, so that they can deliver the best patient care.

The platform is entirely free for practices and clinicians to join, and all commission costs have been covered by the CCG.

There are now 53 practices (59%) across BSW that have signed up to Lantum. Clinician sign ups to the platform have also been growing in number and shifts starting to fill.

Practice Managers can register their practices here:

<http://info.lantum.com/bsw-pm-sign-up-0>

Clinicians can sign up here:

<http://info.lantum.com/bsw-staff-sign-up-0>

Lantum Rota Pro

The CCG has also funded the use of Lantum's Rota Pro tool to help with the deployment of PCN's staff across BSW's PCNs. Using the tool, PCN managers can roster their salaried staff or ARRS roles for their PCNs for free.

What is Lantum?

Lantum is a healthcare workforce platform that aims to unite all clinicians with their healthcare organisations, so that they can deliver the best patient care.

What are the benefits for my PCN?

1. Make collaborative working simple

- Deploy staff effortlessly across your PCN with a network-wide bank of all staff types - from GPs to ARRS staff.

2. Set up and staff new services in record time

- Launch, schedule and staff new services quickly with a staff bank and integrated rota that gives full visibility across all relevant organisations.

3. Schedule ARRS staff equitably and efficiently

- With a network wide, integrated rota tool, you can schedule shared staff across practices in your PCN, to ensure transparency over how their time is used.

4. Save time spent on administrative procedures

- Governance, pension forms, invoicing and payments are taken care of, reducing administration time further.
- Use Lantum's salaried timesheets function to speed up the ARRS reimbursement process.

What are the benefits for my workforce?

1. Book work instantly and be notified of work

- Staff can update their profile, set their availability and immediately be assigned into shifts.
- They will receive session notifications that match your needs and preferences.
- Staff can manage their diary on the go, through the Lantum app.

Next steps:

1. Set your availability for a training session with Lantum's Account Manager, Charlie Mostyn, by clicking [here](#).
2. You will be invited via Microsoft Teams to the training - please do your best to attend.
3. Instantly onboard your ARRS staff by sharing this [sign up page](#) with them.

If you want to learn more about how to unlock the value of ARRS for your PCN, please click [here](#).

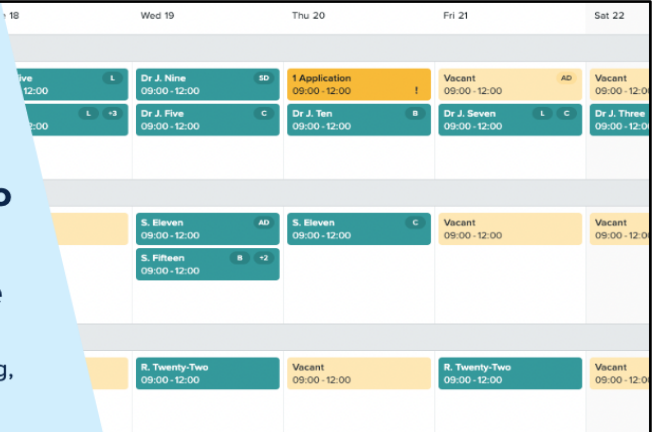

If you have any questions, or need help getting started, please contact Lantum directly at customersuccess@lantum.com

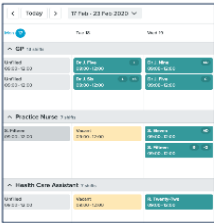

Please see the visual overview of what the Lantum Rota Pro tool offers below.

Rota Pro: powerful e-rostering to manage your staff and find clinician locums, all in one place

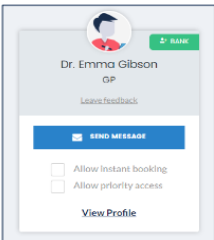

Lantum's Rota Pro combines your rota and staffing, so you can manage multiple sites, staff and shifts more easily.

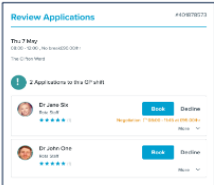

Manage your practice and staff rotas, all in one place

- Manage staffing for multiple rooms or sites in one place
- Get an overview of rotas for different staff types, like for nurses and GPs
- Combine and integrate your salaried staff and additional locums within the same rota

Build your collaborative staff bank

- Efficiently share staff across multiple sites within your primary care network and hub services
- Get an overview of hours worked for each site by staff member or locum for greater transparency and to help with workforce modelling

Automate the filling of rota gaps

- Fill shifts and gaps with staff from your own practice or colleagues from within your local staff bank
- Access and book staff from our marketplace of over 21,000 clinicians, then integrate them directly into your rota
- Enable clinicians to apply directly to fill gaps, review their applications and message staff in the same place
