

Register to access over 20 hours of FREE online CPD

GatewayC is an online cancer education platform developed for GPs, practice nurses, GPs in training, health care assistants, physician associates and other primary care professionals across England.

Our courses are supported by Cancer Research UK, Macmillan Cancer Support and other major cancer charities. Courses are accredited by the Royal College of General Practitioners.

All courses include interactive video consultations based on true patient experiences, interviews with oncology specialists and reflective activities.

GatewayC's most popular courses:

- **'Improving the Quality of Your Referral'** focuses on clinical decision making and safety netting, including Dr Ben Noble's Cancer Maps to support this.
- **'Brain Tumour - Early Diagnosis'** assists GPs to assess symptoms possibly indicative of a potential brain tumour, and increase their confidence in clinical decision making.
- **'Faecal Immunochemical Test (FIT)'** increases health professionals' understanding in using FIT as a screening tool, and appropriate use with symptomatic patients.
