

Guidance for Coding, flagging storing and searching July 21 (refreshed appendix to guidance on completing the Quality Assured Framework)

Merged List of Virgin Codes and proposed GP Codes

Almost all surgeries in BSW are now using Systm1 and ARDENS. The suggested codes are embedded in the ARDENS safeguarding template **but not always at the top**, as the drop-down list is in alphabetical order. The bracket indicates the drop-down box within the safeguarding template that contains the correct READ code.

Because there is some concern that when the “safeguarding relevant” box is ticked FIRST on the Ardens safeguarding template that some of these codes do not appear in searches, we recommend that you keep a separate list of patients with the READ codes that trigger payment the safeguarding contract, to enable more robust data interrogation for any possible discrepancies.

The green codes are SNOMED codes, just for background information and to try to future proof the process.

Guidance for use of the ARDENS safeguarding template

ARDENS Safe Node <https://ardens.freshdesk.com/support/solutions/articles/31000070364-safeguarding>

CODES THAT ARE NEEDED FOR COMPLETION OF BaNES QUALITY ASSURED FRAMEWORK pending National code roll out.

Children

1. *Subject to Child Protection Plan* – **XaOnx** (protection plan) **342191000000101**
2. *Family member subject to Child Protection Plan* - **XaPkF** (family) **375041000000105**
3. *No longer subject to Child protection plan* – **XaOtl** (protection plan) **342891000000105**
4. *Family member no longer subject to child protection plan* - **XaPkG** (family) **375071000000106**
5. *Child in Need* - **XaIO8** (Children in need) **135891007**
6. *No longer on child in need plan* – **XaIO7** (children in need) **135890008**
7. *Child cause for safeguarding Concern* (Code not currently used by virgin) - **XaZJs** (concerns) **836881000000105**
8. *Looked after Child* – **XaXlt** (looked after child) **764841000000100**
9. *No longer looked after child* – **XaXMD-** (looked after child) **764951000000107**
10. *Referral to children safeguarding team* (code not currently used for children by virgin) – **XaXif** (referral) **514341000000108**
11. *Child protection report submitted-* **YA619** (management. Recommend start using for possible LES) **no equivalent SNOMED Code.**

Adults

1. *Vulnerable Adult* (code not currently used by virgin) – **XaKxv** (vulnerable) **417430008**, or **vulnerable elderly person 247811000000108**
2. *Referral to Adult Safeguarding* - **XaQok** (referral) **514331000000104**
3. *History of Domestic Violence* (code not currently used by virgin) – **XaJhe** (abuse) **412732008**
4. *Referral to Domestic Violence Advocate* - **XaNbl** (abuse) **431719007**
5. *Vulnerable Adult care plan* eg if under a MARM **XaQmN** (management care plan). **735330008** Use this for payment under the primary care safeguarding contract, e.g. when there has been a MARM for self-neglect organised or attended, or a social worker has been involved in a care plan for someone at risk of abuse. Once the plan has ended and there are no longer any safeguarding concerns this should be moved to inactive problem so it does not appear in the quarterly return.
6. *Safeguarding Adults protection plan agreed* **XabzB** (management care plan) **943001000000107**. Use this for payment under the primary care safeguarding contract, where eg a safeguarding alert has been made, and you have had input into a safeguarding meeting, or a plan to keep a vulnerable adult safe has been agreed (whether or not it has gone on to a section 42.2 enquiry). Once the plan has ended and there are no longer any safeguarding concerns this should be moved to inactive problem so it does not appear in the quarterly return.

The Safeguarding template will generate the safeguarding flag when the code is added.
In order for the code to appear on the problem list an additional keystroke is required (See “how to” guide for safeguarding template)

Guidance for coding DVA

<https://www.bswccg.nhs.uk/for-clinicians/safeguarding/adult-safeguarding/banes-locality/1839-guidance-on-recording-of-domestic-violence-jan-2021/file>

Subject of multi-agency risk assessment conference- XaX96 this code gets added to the patient record if anything is written in the MARAC notes box on the DVA template **758941000000108**

Additional useful Safeguarding Codes

- *Unborn child subject to Child Protection Plan – XaYs9* **818901000000100**
- *Unborn child no longer subject to Child Protection Plan- XaeDd* **1025431000000104**
- *Family history mental disorder – 128* **160324006**
- *Family history of alcohol - ZV1A0* **266890009**
- *Family history of substance use- XaMzo* **287351000000105**
- *Patient themselves providing care –Ua0VL* **224484003**
- *Carers Assessment Offered -Y3405* no equivalent SNOMED code

Guidance for setting up Searches

Clinical Reporting>Ardens>Safeguarding

Adults:

No of vulnerable adults coded and flagged: *Adults Registers > Safeguarding - Vulnerable adult (XaKXv) – snapshot as at time of running.*

No of referrals to safeguarding adults team: *BaNES Trust Reporting Unit>Safeguarding>Safeguarding Referrals >Referrals to safeguarding adults in the last 6 months. Search published so practices can run it on their unit for their patient cohort only. All TPP practices in BaNES are able to access these searches.*

Children

No of children coded and flagged as on CPP: *Ardens > Safeguarding > Child Registers > Child safeguarding - Protection plan (read code) – snapshot as at date of running*

Number of unborn children with CPP – *there is an Ardens search for this- snapshot at time of running*

No of children coded and flagged as on CIN: *Ardens > Safeguarding > Child Registers > Child in need – snapshot as at date run.*

No of children coded as LAC: *Ardens > Safeguarding > Child Registers > Looked after child – snapshot as at date run*

No of referrals made to children’s social care in last 6 months: *BaNES Trust Reporting Unit>Safeguarding>Safeguarding Referrals>Referrals to safeguarding children in the last 6 months xXlf only,*

No of patients coded and flagged for DVA: *Ardens > Safeguarding > Adults Registers > Violence & abuse - Victim of domestic violence. This needs to be snapshot active (current) problem list only. The Ardens search looks at a snapshot based on READ codes. When the patient is no longer a victim of domestic violence, change to past inactive problem.*

No of referrals accepted by IRIS in last 6 months: *BaNES Trust Reporting Unit>Safeguarding>Safeguarding Referrals>Referrals accepted by IRIS in the last 6 months. No of Child in Need reports received in last 6 months: this needs to be a manual collection*
